Bismarck foreign policy pdf book pdf file download

Originally published in 1968, this was the first time that a comprehensive selection of documents on Germany in the age of Bismarck was made available to students and other readers in English. The documents were chosen to illuminate not only the personality and policies of Bismarck but also the nature of the problems he faced and the reactions of his contemporaries. The substantial introduction serves as a general background and guide to the documents, which are in the form of letters, essays, polemics, speeches and memoirs, produced in the period itself. They enable the student to gain a true firsthand understanding of the workings of minds and institutions in Germany during three of the most eventful decades of its history. Part 1: The Age of Bismarck 1. Introductory: Prussia and Germany in 1862 2. Bismarck and the constitutional conflict in Prussia 3. Bismarck and the unification of Germany 4. Political problems and developments in Germany 5. Religious and cultural aspects of Bismarck's Germany 6. Economic and social problems in Bismarck's Germany 7. Aspects of foreign policy 8. Bismarck's Last Years in Power Part 2: Selected Documents A: The Prussian Constitution Conflict and Its Settlement After the Defeat of Austria B: Foreign and Domestic Problems Between 1866 and 1871 C: The Franco-Prussian War D: The Bismarckian Empire E: The Kulturkampf F: The Social Problem G: Bismarck and the Liberals After 1871 H: Bismarck's Fall The career of a historical personality, Wilhelm Dilthey observed, is marked by mutual influences. In his early years such an individual is shaped by forces whose course of development he himself later helps determine. Because of this interaction, Schleiermacher's biographer was forced to expand his subject to include the intellectual history of an entire era. What applied to Schleiermacher, theologian, it was also true of Bismarck, the statesman. Traditional form cannot capture the meaning of a political figure of his stature. As important as the man himself were the many social, political, intellectual and institutional forces that shaped his environment of him and with whom he had to do. This work deals with the interaction between these forces and the will of a political genius. It is a study on the effect of a man of extraordinary talent on the historical process. Therefore, the most personal and anecdotal aspects of Bismarck's life are included only when they indicate attitudes or influence politics and events. The goal is to expose the elements of thought and perspective that determined its political objectives, the strategic techniques with which it was used to achieve them and the final consequences of both for the German political development. Usually the period of unification in Germany was studied from the point of view of foreign affairs. Such an orientation of the year 1871 the appearance of an end rather than a beginning. This book tries to connect the history of diplomatic maneuvers, war and victory to the greater problem of Germany's internal political growth. Attention focuses on the internal consequences of internal and foreign politics and events. From this point of view, the period of unification was a period of revolution and reconstruction that established the character of political attitudes and German institutions until recent times. The subsequent period of consolidation, which includes the internal history of the German Confederation of the North, was reserved for a subsequent volume. Drant the years of research consumed by this project I contracted personal debts of various types. The largest is the one attributed to Hajo Holborn of the University of Yale. It was he who more of ten years ago made me point out for the first time the need of a new approach to the problem of Bismarck. Without him the advice, his support and encouragement, this volume would never have been completed. With acute political moves, he cleaned up the opportunity to obtain European hegemony for Germany and, therefore, considerably alter the European political scene and the balance of power. As a main architect of German unification, he used a subtle diplomacy, the formation of alliances, the formidable army of Prussia and a series of calculated wars, even if limited, against its European neighbors to create the second German empire. As archetype of statesman who married the power of the state in the international system, Bismarck recognized that a foreign policy and a successful national strategy required the conscious integration of force
